Portuguese Native

English Fluent

Spanish C1 Certified

EDUCATION

Bachelor's in Design

Universidade de Brasília — UnB
(Graduated Sep 2023)

INTERESTS

Social studies · Books ·
Psychology · Ceramics

PROFILE

I am a product designer with 3+ years building B2B SaaS at scale. I work across the full design cycle — from research and systems thinking to UI execution and prototyping — and I updated my work flow to include AI in order to explore more ideas and ship faster, not to cut corners and sacrifice quality.

EXPERIENCE

Product Designer – Dentsu Feb 2023 – Present

- Led UX and UI for a B2B event management platform serving a global beverage client — 100,000+ annual events across North America.
- Designed and illustrated a gamification campaign that drove 164% feature adoption, a 550% peak in profile interactions, and a 64% email interaction rate.
- Architected a full Design Token system (~400 tokens, Primitive + Semantic) enabling a cross-platform Dark Mode launch with zero visual regression.
- Redesigned the Reports Engine from a static download page into a multi-module dashboard — stakeholder-approved for 2026 dev; projected 80% reduction in spreadsheet dependency.
- Led six seasonal illustration theme packs over one year — 100% on-time, all approved on first stakeholder review, zero usability regressions.
- Promoted from Jr. UX/UI Designer · January 2025

Designer Intern – Brazilian Chamber of Deputies Aug 2022 – Jan 2023

- Selected for one of Brasília's most competitive institutional design internships.
- Applied design thinking, research, and visual communication to digital institutional projects.

Design Intern – Federal Data Processing Service (SERPRO) Oct 2020 – Mar 2022

- Produced visual assets for one of Brazil's largest federal IT organizations — presentations, e-books, banners, and social media content.
- Created storyboards and assisted in production of internal communication videos.
